

BOTTOM UP!

ETUR TEXTILE IN ETHIOPIA MANUFACTURERS RECYCLED FABRICS AND GARMENTS IN ETHIOPIA

Etur Textile PLC is a vertically integrated manufacturer of 100% pollution free regenerated fibers, regenerated yarns and circular knitted fabrics and garments. The company is located in Ethiopia and supplies buyers in Europe and North-Africa with finished garments made from recycled materials.

COMPANY HISTORY AND VISION

ETUR Textile Plc was established in Addis Ababa, in 2010. The company is a subsidiary of Yüksel Tekstil: a pioneer of the Turkish textile industry since 1960. ETUR Textile in Ethiopia uses 100% pollution free processes to produce regenerated fibers, regenerated open-end yarns and circular knitted fabrics. The input material is 100% cotton clips and cuttings: remnants of knit clothes production from garment manufacturers all over the world.

The company has 6 lines of Shoddy (Re-generated Fibers) machines with approximately 65 tons per day capacity.

ETUR has 3792 Rotors, 36 Carding Frames with sliver regulator, 10 Drawing frames with sliver regulator and self-developed fiber blending machineries to reach maximum level of

yarn quality.

We are able to produce starting from Nm 1/1 (Ne 0,60/1) to Nm 50/1 (Ne 30/1)

In single yarns, 2 plies and multi folds in different blends;

- Cotton / Polyester
- Cotton / Acrylic
- Cotton / Viscose
- Cotton / Bamboo
- Cotton / Polyamide
- Cotton / Wool / Other Synthetic Fibers
- Cotton / Flax / Other Synthetic Fibers

And also any other blends required by customers.

PRODUCTS

Regenerated yarns, circular knitted fabrics and finished garments.

- Circular and flat-bed knitted products: sweaters, T-shirts, sports wear
- Hosiery (sport socks, men's, lady's and children's socks)
- Weaving (warp and weft)

- Upholstery fabrics
- Carpets
- Tufting
- Floor mops
- Cotton blankets
- Bed and sofa covers
- Table clothes and napkins

MARKETS AND STRATEGY

ETUR's main markets are Portugal, Greece, Egypt, Algeria, Morocco and Turkey. The main export products are finished garments.

CSR

ETUR Textile is [BSCI](#) certified.

Every year the company saves 29.9 million cubic meters of water and 30,000 Kw electric by re-cycling 6,000 tons of fabric remnants and about 1,000 tons of cotton spinning leftovers from the global textile industry.

With the varieties of circular knitting machines from 3' Gauge to 28' gauge, ETUR manufactures 120 gsm to 550 gsm circular knitted fabrics:

- Single Jersey
- Rib
- 2 end Fleece
- 3 end Fleece
- Pique
- Camisole
- Cardigan
- Blankets, Bed and Sofa Covers

All types are produced with or without spandex.
